

AMOS SIMINTEI WANGORA

Senior Port Digital Transformation & Trade Facilitation Consultant

Maritime Single Window | Port Community Systems | Change Management | Africa & Emerging Markets

East Africa specialist with U.S. availability | International consultant operating between the U.S. and Africa | TradeLogix Consulting Ltd

EXPERT BIO

Amos Simintei Wangora is a senior port digital transformation, maritime single window, and trade facilitation consultant with over 25 years of experience supporting port modernization, automation, systems integration, and institutional change across East Africa. He combines practical port operations experience with executive leadership in national trade facilitation reform, having served as Chief Executive Officer and Project Director at the Kenya Trade Network Agency (KenTrade) and previously held senior operational and systems implementation roles at Kenya Ports Authority.

His experience covers port digital transformation and automation, Maritime Single Window and Port Community System readiness, terminal operating systems, port-customs integration, stakeholder engagement, change management, institutional readiness, and capacity building. He has supported assignments for government agencies, port authorities, customs administrations, terminal operators, private-sector stakeholders, and international development partners, including recent IMO-related Maritime Single Window work in Tanzania.

CORE ADVISORY CAPABILITIES

Technical Transformation

- Port digital transformation and automation advisory
- Maritime Single Window and Port Community System readiness
- Terminal Operating System and ERP implementation oversight
- Port-customs systems integration and process automation
- Port performance, data, statistics and operational reporting

Institutional & Change Advisory

- Institutional readiness and change management
- Executive stakeholder engagement and facilitation
- Multi-agency coordination across government and private sector
- Capacity building, training and adoption support
- Trade facilitation and regulatory process improvement

SELECTED RELEVANT EXPERIENCE

- Consultant to the International Maritime Organization (IMO) for Maritime Single Window needs assessment and regional MSW/PCS capacity-building assignments in Tanzania.
- Project Director / Lead Consultant for the Zanzibar E-Port Project, supporting automation of port administrative and operational functions including TOS, ERP and vessel tracking components.
- Chief Executive Officer and Project Director at KenTrade, leading Kenya National Electronic Single Window implementation and operationalization, coordinating 43 stakeholder institutions and supporting more than 15,000 active registered users by 2021.
- Project Manager for KWATOS at Kenya Ports Authority, supporting automation of container terminal, marine, conventional cargo and inland container depot operations at the Port of Mombasa.
- Team Leader for port-customs systems integration between Kenya Ports Authority and Kenya Revenue Authority to improve cargo visibility, operational efficiency and information exchange.
- Port operations expert for Kenya Ports Authority tariff, port statistics and operational modernization assignments, including technical input into port performance indicators and reporting standards.

QUALIFICATIONS & CREDENTIALS
